

Product Announcement

Models: Greenstar Boilers

Brand: Bosch

Subject: Product Update

BOSCH

Introduction

Product Management would like to inform you that all Greenstar boilers have been updated to include a larger diameter pipe leading to the pressure relief valve.

Purpose

Greenstar boilers have been updated to include a larger diameter pipe leading to the pressure relief valve. This is to eliminate potential confusion in local code interpretations. The diameter of the piping has increased from 18mm to 22mm. (see fig. 1). Replacement parts have been updated to include new part numbers and are not backwards compatible to fit older units.

Details

The old Greenstar models will continue to be sold as they still meet current requirements and are not affected in any way.

Greenstar Floor:

- Units manufactured after January 2020 (date code 037) will have this new change

Greenstar Wall:

- Units manufactured after February 2022 (date code 238) will have this new change
