

Product Announcement

Models: Greenstar Boiler

Brand: Bosch

Subject: Change of Electrodes Spare Part

BOSCH

Introduction

Product Management would like to inform you of an update to the electrode spare part used in Greenstar boilers (all models). The electrode design has been refined to further optimize system performance and consistency. The updated version includes an additional spring that enhances grounding for the spark. The new electrodes remain fully backwards compatible when used with the accompanying harness.

Phase In / Phase Out

The new electrodes are not yet in production, planned introduction is in the coming months. You will be informed about the exact date.

Spare Parts

As the new electrodes require a new harness in order to be installed, the Service Kit Ignition (Part Number: 8737714936) must be ordered as it includes the new harness. The old electrodes (Part Number: 87186649200) have been discontinued and are not available anymore.

Discontinued	New
Electrode	Service Kit Ignition
