Bosch Thermotechnology Introduces Two Additions to Its Electric Tankless Water Heater Lineup

Bosch's new Tronic 4000C and Tronic 6100C bring new levels of efficiency to on-demand hot water.

WATERTOWN, MASS., (January 11, 2023) - [Bosch Thermotechnology](#), a leading global source of high-quality heating, cooling and hot water systems, introduced today two new innovative members of its electric tankless water heater family: [Tronic 4000C](#) for point-of-use, under-sink installations and the new [Tronic 6100C](#) for whole-house applications. Both products deliver 100% electric, high-efficiency on-demand hot water with a compact design for significant energy and space savings.

"All-electric, on-demand hot water is in high demand for both consumer and commercial applications," said Victoria Otto, product manager at Bosch Thermotechnology North America. "The Tronic 4000C replaces previous models with a completely redesigned housing packed with new features and a tiny footprint so it can be installed out of sight under practically any sink. The Tronic 6100C has a sleek, modern design that swaps out analog knobs with an LED screen and clean, intuitive touch buttons for temperature. This product comfortably delivers enough hygienic hot water even for large homes."

Tronic 4000 C

The Tronic 4000C is one of the smallest yet most energy-efficient electric tankless water heaters on the market today. At only 8.5" X 13" and only 4.4 lbs., it can be wall-mounted directly under the sink, and because it runs on electricity and doesn't hold water, there is no venting and virtually no maintenance required. The Tronic 4000C comes in four model options: 3.5 kW, 6.5 kW, 8.5 kW and 10.5 kW, delivering up to 96 Uniform Energy Factor (UEF) ratings.

With significant energy and space savings, this tankless water heater delivers for point-of-use applications from residential to light commercial. Although tiny, its powerful output makes the Tronic 4000C ideal for use in homes, cabins, newly remodeled spaces and more as well as office buildings/break rooms, apartments, warehouses and even stadiums with sinks that are either not in use or in bursts of high demand, such as during an event.

Tronic 6100 C

The Tronic 6100C provides on-demand hot water for the entire home. With the debut of the Tronic 6100C, Bosch combines the energy savings and convenience of tankless water heaters with a beautifully streamlined, easy-to-install, compact and lightweight design. The stainless-steel canister inside the unit heats up the water but does not store water like a traditional tank water heater, which makes for a much more hygienic system. It also uses technology with modulating elements that ensure a constant output temperature. This means regardless of whether the water that comes into the house is near freezing in the winter or simply cool in the summer, the temperature that comes out will always be consistent with the homeowners' desires.

The Tronic 6100C takes up very little space with measurements of 13 ¼" X 20 ¼" and comes with 3/4" NPT fittings for both cold and hot water connections, making it easy to install in place of outdated tank

water heaters. It delivers an impressive 95% efficiency with no stand-by loss, so no water or electricity goes to waste.

Both new products offer Bosch's 5-year warranty. For more information and complete warranty details, please visit <https://www.bosch-thermotechnology.us/>.

About Bosch Thermotechnology Corp.

Bosch Thermotechnology Corp. is a leading source of high quality heating, cooling and hot water systems. The Company offers Bosch tankless, point-of-use and electric water heaters, Bosch and Buderus floor-standing and wall-hung boilers, Bosch and FHP water-source, geothermal and air-source heat pump systems, as well as controls and accessories for every product line. Bosch Thermotechnology is committed to reinventing energy efficiency by offering smart products that work together as integrated systems that enhance quality of life in an ultra-efficient and environmentally friendly manner.

Bosch strives to bring the most energy-efficient and environmentally responsible products to global consumers. In delivering the best products at affordable prices to our markets, Bosch has established multiple collaborations and joint ventures on a global scale to bring the latest technologies to North America. All global manufacturing facilities must adhere to stringent quality standards in order to provide the trusted Bosch brand.
